

jeeboni

The Personal AI Assistant for productivity

Helping individuals unlock 40% of their time for real-world engagement.

The Problem

Over **5 billion internet users** worldwide spend an average of **7 hours per day** on digital applications, leading to widespread **digital disconnect** from real-world experiences, **passive consumption** of content, **fragmentation of personal histories**, and **difficulties in managing social connections**. This excessive screen time results in significant **productivity losses**, with the US alone experiencing an annual **cost of \$86.3 billion**, highlighting the global economic and social impact of these issues.*

* The Impact of Unmanaged excessive screen time in the United States, American Optometric Association 2024

The Solution

Jeeboni is a Personal AI Assistant enabling **AI memory management**, **AI connection management** and **AI family history management**, reducing the need for screentime by leveraging AI indexing and interfaces, **freeing upto 40% of time lost** to regain real world engagement.

Market

Our **total market is over 450 million from disconnected social media users**. The initial focus is on users already looking to reconnect with their circles and families, representing a **\$4.2 million/year opportunity**.

TAM

Total Addressable Market

=

\$450M

5% of 5 billion social media users at 3% conversion to premium

SAM

Serviceable Addressable Market

=

\$4.2M

20% of 35M diaspora converting at 3% to premium

SOM

Serviceable Obtainable Market

=

\$60K

Syed family members 100,000 signups converting at 3% to premium

How It Works

We are developing **proprietary productivity app to users** to prompt the most needed information of their connections, memories and legacies through an intuitive AI interface.

1 Manage communications

secure messaging, calls, video

2 Manage Circles

friends, families, work etc

3 Manage memories

notes, photos, videos

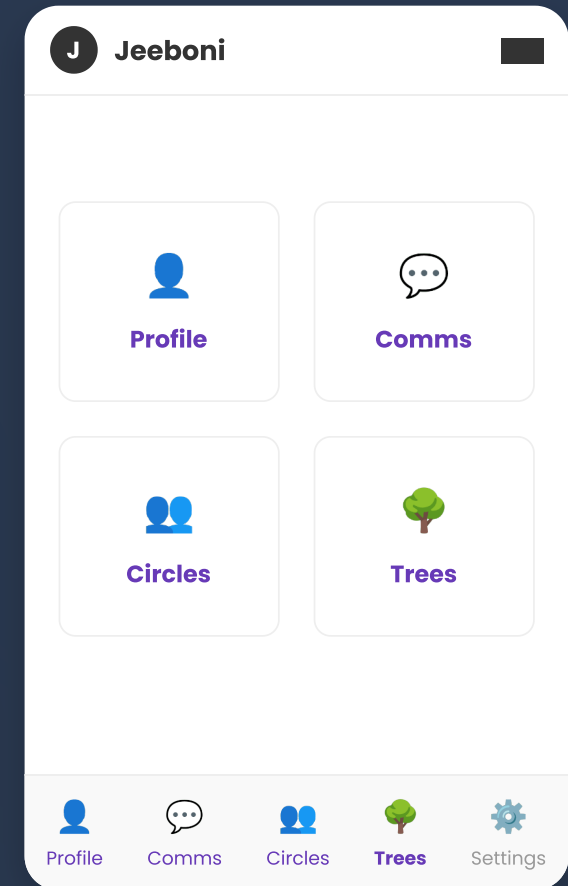

4 Manage family tree connections

connected tree with the rest of the family

5 Unified AI interface

to navigate through them all

User saves time on an optimized productivity stack.

Business Model: Freemium

Free Core

- Essential Communication
- Circles
- AI/Memory features
- Trees / Legacy Building

FREE FOREVER

Premium Tiers (Year 2+)

- Enhanced Storage
- Advanced AI Features
- Advanced Circle/Tree Tools
- Premium Support

Target ARPPU ~\$60/yr

Go-To-Market

Go-to-Market Strategy – Phased

Secured first Partnership with the historian of the Syed Family to offer it to the whole Syed Family Network who are regular buyers of the family history book of the past 6 editions.

Year 1

1

Develop & Validate

- Build core product, achieve maturity
- Seed initial networks for feedback & validation
- Goal: 10k MAU
- Manage initial growth for stability

Year 2

2

Monetize & Expand

- Launch/refine premium tiers
- Expand outreach to diaspora hubs & communities
- Focus on validating monetization model

Year 3+

3

Scale Globally

- Unleash network effects
- Scale marketing & partnerships
- Drive hyper-growth

Competitive Landscape

Jeeboni is addressing the **73% of people** who find **digital life too fragmented** with an integrated platform, not another app.

- WhatsApp:** Fragment general tool, not an integrated solution
- Ancestry:** Focused on family trees, limited in other areas
- Notion:** Knowledge-fixated. Ignores broader connection needs

Platform	Communication	Circles/Groups	Memory/Notes	Family Tree/Legacy	AI Integration
WhatsApp	✓	✓	—	—	—
Ancestry	—	—	—	✓	—
Notion	—	—	✓	—	✓

Jeeboni is the only platform that offers **all five key features** in one integrated solution.

Traction

Demo of Product Launched in 1st 2 weeks of development!

Demo Launched

Apr 24th 2025, Available for Android, IOS and Web

100+ Users waiting list and growing

Since demo Launch Apr 24th 2025

- Strategic Partnerships – Syed Family Network
- Strategic Partnerships – UK Bangladeshi Expat Community
- Strategic Partnerships – US Bangladeshi Expat Community

Team

\$100M+ in Tech Projects Delivered

Nayeem Syed – Founder & CEO

Financials

EOY MAU

Revenue, Costs & Net Profit

Key Metrics

Annual Churn: Y1: 0% Y2: 5% Y3: 10% Y4: 15% Y5: 15%

Premium Conversion: 3% (>10k users)

ARPPU: \$60/year (\$5/month)

Strategic Notes

- Y1: Development focus, no monetization
- Y2: Freemium model introduction with premium features
- Y3+: Aggressive global user acquisition focus
- Y3 growth rate higher due to removing beta cap on signups, with significant waiting list expected
- Low churn due to network stickiness & integrated utility
- Costs increase with development, monetization & growth investments
- Profitability projected in Year 4 as scaled growth drives revenue

The Ask

\$250,000 – \$500,000

Pre-Seed Funding
(12-24 months runway)

Use of Funds
